

1. Startup Landing Page

Objective:

Create a multi-section landing page for a startup using Bootstrap 5.

Requirements:

- Use Bootstrap via CDN (Introduction)
- Responsive layout using the **Grid System**
- Navigation bar with collapse functionality (**Navbar Component**)
- Hero section styled like a jumbotron using utility classes
- Use cards to showcase services or products
- Add scrollspy or sticky navbar (**Advanced Bootstrap Feature**)

2. E-commerce Product Catalog

Objective:

Design an online product listing page that adapts to various devices.

Requirements:

- Grid-based layout for products (Grid System)
- Use **Card Component** for individual product display
- Filter/sort bar using **Form Components**
- Buttons styled using `.btn-*` classes (Utilities & Components)
- Responsive breakpoints and spacing helpers
- Add tooltips or modals for “Quick View” features (**Advanced Components**)

3. Blog with Sidebar and Modal Comments

Objective:

Build a blog interface with a main content section and a sidebar.

Requirements:

- Use grid system for layout: 2/3 content, 1/3 sidebar
- Cards for blog posts with images, titles, and snippets
- Modal for adding comments (**Modal Component**)

- Use utilities like spacing (**m-3**, **p-4**), colors, and typography
- Include pagination and collapsible tag list in sidebar
- Responsive using Bootstrap's breakpoints and containers

4. Admin Dashboard

Objective:

Create an admin dashboard with panels, charts, and data summaries.

Requirements:

- Use grid system to arrange panels in rows and columns
- Navbar and sidebar navigation
- Use components like **Alerts**, **Badges**, and **Tables**
- Apply utility classes for coloring, spacing, text styling
- Include accordion or collapsible sections for advanced filtering
- Use progress bars and tooltips (**Advanced Features**)

5. Responsive Mobile App Landing Page

Objective:

Develop a mobile app landing page that is fully responsive and elegant.

Requirements:

- Introduction and download section styled like a jumbotron
- Use responsive images with **.img-fluid**
- Grid layout for feature highlights (3 or 4 columns)
- Use Bootstrap **carousel**, **buttons**, and **cards**
- Floating action button or sticky call-to-action button (**Advanced Bootstrap Utilities**)
- Include a subscription form with form validation classes
