✅ 1. Introduction to Bootstrap 5

🔷 Direct Challenge:

Task:
Create a simple HTML page that includes Bootstrap 5 using the CDN and displays a primary-colored heading and a paragraph.

🔷 Scenario-Based Challenges:

1. **Responsive Starter Page:**
   Build a welcome page for a startup that uses Bootstrap 5 CDN. Include a navbar, a jumbotron-style intro using utility classes, and a footer.

2. **Quick Themed Page Mockup:**
   Develop a landing page for a travel website using only Bootstrap classes. Include a header, image section, and call-to-action button styled using Bootstrap's default theme.

✅ 2. Bootstrap Grid System

🔷 Direct Challenge:

Task:
Create a layout with a `.container`, a `.row`, and two columns each occupying 6 out of 12 grid columns (`.col-6`).

🔷 Scenario-Based Challenges:

1. **Three-Column Services Section:**
   Design a section with three equal-width columns showing services offered. Use the grid system to ensure they're side-by-side on large screens but stack on mobile.

2. **Responsive Pricing Plans:**
   Create a pricing page with three pricing plans. Each plan should be in its own column and adjust from 3-per-row on desktop to 1-per-row on mobile using grid breakpoints like `col-md-4`.

✅ 3. Bootstrap Components

🔷 Direct Challenge:

Task:

Add a Bootstrap-styled button (`.btn-primary`) and a Bootstrap alert below it that shows a welcome message.

◆ Scenario-Based Challenges:

1. **Login Modal Component:**
   Create a modal popup triggered by a button. The modal should include fields for email and password and a "Login" button using Bootstrap components.

2. **Product Card Display:**
   Create a responsive card layout to showcase a product with an image, title, description, and "Buy Now" button. Style using Bootstrap's `card`, `btn`, and spacing utilities.
